Want to learn about the UN’s Sustainable Development Goals?

Want to learn French vocabulary related to Environmental Science and Sustainability?

Sign up for GEOL 0008: Environmental Science: French Trailer

GEOL 0008 is a one-credit French language trailer for the class GEOL 0840 Environmental Science. The class will meet once a week to discuss the UN sustainability development goals related to GEOL 0840: Environmental Science topics. We'll focus on French vocabulary related to sustainability, air pollution, water pollution, energy, environmental justice, and climate change. Class discussion/activities will be primarily in English. Readings for discussion will be in French with a target audience of policymakers or the public.

Prerequisites:
- Equivalent of two-years of high school French, Equivalent of French 102 at Pitt, or instructor permission
- GEOL 0840 or an equivalent course should be taken prior to or concurrently with GEOL 0008 (GEOL 0840 counts for the Natural Sciences General Education Requirement), or instructor permission

Class meeting time will be determined based on student schedules the week of August 30th.
